WOODWORKING

UNLEASH YOUR CREATIVITY

EASTER ISLAND HEAD

TOOLS REQUIRED: Industrial Blade, Mini-Grinder,

Step 1 Using the attached design layout trace your Easter island head onto your piece of timber.

Step 2 Work gently in a sweeping motion to give your Easter Island head the shape you desire. It is important to stop periodically to check that all you're shaping is symmetrical.

Step 3 Using the Industrial blade, shape out your design until you are happy with the rough shape.

Step 4 Once the rough shaping is completed swap to the Mini-grinder to detail your Easter Island head.
